

OSHA 8,24 & 40-hr Hazwoper

OSHA 8, 24 & 40-hr HAZWOPER Training

Course Description:

These courses will help you and your employees assess and understand the hazards associated with uncontrolled hazardous waste sites, in order to ensure work can be conducted in a safe manner. Required competencies will be addressed through a combination of lecture, group experiences, and hands-on exercises. By combining these training practices we develop a level of competency that will train employees to recognize, avoid, or protect themselves from unsafe conditions at work sites, and will in-turn aid in the prevention of injury. Emergency Responder training is also available. The requirement for an annual 8-hr refresher course is also included in this course offering.

Course Objective:

The requirements for training compliance can be difficult to understand. Let us help you determine which course(s) are needed for your operation. Our HAZWOPER courses are designed to meet or exceed the OSHA requirements for training of personnel engaged in hazardous waste operations. These requirements are specifically outlined in 29 CFR 1910.120 and can include the removal or handling of underground tanks and/or piping, contaminated soil or ground-water, sub-surface investigations, construction work in which hazardous materials are present or at risk of being present.

Course Length:

8-hour: Awareness Level & Annual Refresher Training
24-hour: Designed for the occasional site worker (See, but not touch)
40- hour: Designed for the Hazardous Waste Worker (Handling & Cleanup)

Target Audience:

- Any worker or supervisor who has direct or indirect contact with hazardous waste or supervises people that do.
