

## Custom Monthly Meetings

### **Custom Monthly Meetings**

**Scope of Work:**

Many of Platinum's clients choose to have us perform monthly safety meetings for their teams. By performing this service we assist them with their compliance issues, reduction of accidents and workman's compensation, and work toward keeping associates current and aware of the risks around them. Too often associates become complacent in the workplace, and generate a false sense of safety. Monthly meeting can help battle this problem. We tailor our monthly presentations to the needs of our clients, and cover a variety of different topics. We train on topics that are current in the market, or are issues of specific concern for your operation or current job site, and cover specific risks with each season and job site. Having monthly safety meetings will help to keep safety in the forefront of your employee's minds, and keep them current on compliance changes and standards.

Having spent many years managing field operations, our trainers know how to present this information in a qualitative yet easy to understand format.

**Objective:**

Our objective is to help your company gain safety awareness and compliance in its operations by working with management and safety representatives to design a program that works for you. We want to arm and empower your employees with the knowledge and skill set they need to perform in a safe fashion, and maintain an accident-free jobsite/work environment for all.

**Target Audience:**

Determined by the monthly topic.
