

MSHA 24 & 40-hr New Miner

MSHA New Miner

Course Description:

This course is designed to assist you in meeting Mine Safety and Health Administration (MSHA) Part 48 requirements for most above ground mines or above ground operations at underground mines. This training applies to miners; as the name implies, but also applies to delivery drivers, independent contractors, and facility personnel that access the mine site. You should be aware of what regulations cover your activity at the mine. There may be additional training requirements or stipulations not covered here, or you may require MSHA Part 46 training. We can assist you in determining what regulatory requirements pertain to you, and what; if any, additional training you may need.

Course Objective:

The goal of this course is to provide the information necessary for you to learn the requirements of a safe workplace while meeting the requirements of the MSHA Part 48 New Miner. Information is presented to help your employees recognize and avoid hazards that they may be exposed to on a regular basis, as well as those which can occur unexpectedly.

Course Length:

24 hours - First Aid/CPR included

Target Audience:

- New Miner
- Newly Hired Experienced Miner
- Mining Contractors
- Maintenance Workers
- Safety Administrators
